Community Program

# Food Detectives

Exploring where food comes from gives us a way to think about the big world all around us and how we use it to be kind to our friends.

**Science & Nature:** What food grows in the ground? We eat plants! What parts of different plants do we eat? Lets sort them into categories: seeds, roots, stems and leaves.

**Arts & Crafts:** Let's make art from a still life of fruit and vegetables. Make collages of a feast and toppings for pizza too!

**Cooking:** Let's make fruit smoothies! Vegetable soup! The teachers will lead the children as they make snacks to share with the whole group.

**Story & Songs:** On Top of Spaghetti, Who Stole the Cookie from the Cookie Jar, Patty Cake. Classic and beloved rhymes, books and songs!

**PLUS:** Games, dress-up, outdoor play, blocks, and plenty more!

## Program Fees
